Company.

BIDDEFORD, MAINE DIVISION
WALTER WELCHWORTH, JR.

[illegible]

The Pepperell Shant has as a definite aim the promotion of good will and better acquaintance in the great Pepperell family.

THE OFFICIAL OPENING OF THE FALL RIVER DIVISION

The above picture was taken on the occasion of starting the first haul of rock through the newly acquired plant of the company at Fall River, which was formerly the Granite Mills.

Mr. Kiehn, wife of the agent at the plant, officiated at the simple ceremony, and as she tossed the first handful of cotton from the first bale into the hopper she remarked, "May we all strive to make this, the Fall River Division of the Peppercell Mfg. Co., as successful as the other divisions." This was on Nov. 11, 1935.

Persons left to right in the picture are Mrs. Klum, Mr. Aulon, Mr. Mayne (night superintendent), Valenta, Reilly, Pauline Zwick, and Helen Michaelbach, cardroom employees; Mr. Hanner, club room waitress; Mr. Hobart, spinning room secretary; Mr. Gilbert, Office Manager; Miss Mabel MacIntyre; Mr. Klum, Agent; Mr. Barrett, manager of the Granite Mill; Mr. DeLoach, overseer cardroom, and Mr. Lahr, Assistant Agent.

A TEXTILE LEADER
(Fiber and Fabric)

The development of Prospect Mills by its aggressive and progressive treasurer, Russell Leonard, is evidence that we were not much wrong two years ago and several times since then, in proclaiming him as a real captain of the textile industry and the man most needed as a leader to pull the industry out of the hole. Mr. Leonard has again shown his broad vision in disposing of his water power and contracting with private specialists to furnish him electricity to operate his mills in Uteland. He is operating mills to make cloth and not running a power business, and the sale of his power to the Wyman group is in line with what will more successfully and result in more and better production at reduced costs.

Wherever desirable powers are owned by textile mills, there are power interests prepared to buy and it is logical and highly practical for mills to get out of the power business and let power specialists run that end while the mills make yarns and cloth.

As we view the sale of Peppercorn sugar, Mr. Leonard has made a most progressive move and will profit for his mill, materially. Apparently he does not carry the idea that the Wyman interests are a bunch of crooks and if Maine people would follow the Leonard idea, the State and its people would soon reap benefits now denied them by their attitude of blocking power expansion.

GLIDER BOAT WINGS
AND RUDDER MADE OF
PEPPERELL FINE COUNT

Shooting Starts Test on Lott's Strength

The Peck Elder Boat Corporation of College Point, Long Island, has developed and flown successfully the first water glider to be built in this country, using Prepared Fine Count sheeting as covering for the wings and the rubber.

This water glider is an outgrowth of the popularity of land gliding to which Colonel Lindbergh has contributed much in the past few months. It is predicted that water gliding will soon take its place alongside land gliding.

The water glider has an all-metal hull, thus giving it exceptional strength. The wing span is 21 feet, and the glider is capable of carrying two people. It is fitted with dual controls to simplify its purpose as a training plane.

The sun glider is put underway by being towed behind a fast motor boat. The glider leaves the water at twenty-five miles an hour under normal weather conditions and attains a height of 1,000 to 1,500 feet.

Although this is not the first exploit of Peperrell failure in the air, it is one of the first marks of Peperrell's abjecting in such a responsible position. It is pointed out that the uniform strength of this failure was one of the principal reasons for its selection, a necessity in wing and rudder covering to avoid accident.

BOWLING LEAGUE BANQUET GREATLY ENJOYED

The banquet held at Squanda Lodge, on the Pine Point road, on the evening of June 27th, was greatly enjoyed by all in attendance. Mrs. Shields put on an excellent dinner and the music for the occasion was provided by Joseph Martin and members of the Philharmonic orchestra.

Practically all superintendents and overmen were present as well as others about the plant. Capt. Leon E. Macomber of the white goods division provided an master of ceremonies, and throughout the banquet a congenial and happy spirit prevailed. Mr. Cox made some very pointed, and well taken, remarks in reply to some ruffling from verse by the Pepperell Post. Joe Hanson created the admiration of all by his rhapsody, and even our experienced expert, John Adams, was obliged to look on and see his hard-earned laurels as eating champion go by the board. Phil Sawyer asked for extra attention from the waitresses by sheer force of his personality, looks, and the large amount of "ill" that he has in his nature. Maurice Goodwin forgot about the ladies and devoted his entire time to the consumption of a "very rare 4-lb. porterhouse steak."

Following the banquet the party repaired to Old Orchard where some of the more optimistic held a bowling carnival in spite of the excess of hot air that prevailed on the particular evening.

THIS MONTH'S COVER

This informal picture of Pepperell's 1936 baseball team was taken at the ball park on Saturday, July 19, just before the start of the contest with the Saco-Lewell. The team has not been beaten to date, and has played the Old Orchard Beach team, East Men, Saco-Lewell (two games), and Sarnabuckport.

In the back row, from left to right, are James Callahan, James Lombard, Ted Sherman. Second row, Frank Masley, manager, Lavalley, Oscar Marchand, Joe Litvin, Carlton Driscoll. Front row, Oscar Goodwin, John Martin, Everett Staples and Belden Emery. "Jim" Murphy, Fardham college football star, is not in the picture but plays regularly with the team. The name of the mascot was written on the ice and the July sun has done the rest.

Enjoy Chicken Dinner

A very delicious shore dinner was enjoyed on the evening of July 23 by fifteen of the superintendents and overmen at the newly opened chicken dinner resort on the New County road known as "The Wigwam" and operated by Mr. and Mrs. Herbert Tarr of this city.

The Wigwam is located in a beautiful spot on the Saco known as Indian Point, and makes an ideal place for an eating house of this type.

Following the dinner, which was all that could be asked for, by anyone who wanted fed on roasted chicken and plenty of it, a game of baseball was played between the Peabody and the Chickens. The climax of this exciting game came when one of the Chickens got roasted by a line drive that another Chicken let fly in the direction of third base. The victim of the unfortunate mishap was Warren King, overseer of spinning on the lower division, who was struck on the wrist by a batted ball. It fractured the bone and was very painful.

Although the incident put a damper on the taste for baseball, the party returned home in good spirits and expect to make another trip to this delightful spot before the summer is over.

Those who attended were General Superintendent E. T. Saulnier, Charles McCarty, Fred Jewell, Warren King, Joseph Hanson, Elmer Burwell, Capt. Harry Smith, Ernest Chapman, Chester Roberts, William Ross, William Dunn, Philip Sawyer, Walter Wentworth and John Gilbride.

Free Advertising

Note: A free advertising service is available for all employees of Pepperell.

Advertisements should carry the street address or phone number, your name and the room in which you work. Your name will not be published unless requested.

For Sale: Brand new Ford six and rim complete. Apply at 48A Prospect Street, City, or Tel. 3781-W.

FISHING PARTY.

A deep sea fishing party was held on Sunday, July 20th, by Pepperell folks and their friends. The party left behind Wharf at about 9:30 a. m. on the Goldenrod and enjoyed a beautiful sail down the Saco and out in the fishing grounds.

Although the day had an "off" day, and were away to church in their best hats and toppers, a few of the stay-at-home were handed over the side and the suspense was broken with each new arrival.

Richard Lennie of the general office spent most of the day atop the craft and enjoyed (?) the most beautiful sunburn that has been seen locally in many a moon. Frank Masley and Wald Goodwin were so busy hauling in the fish all day that they found no time for anything else. Joe Bouchard taught the boys how to sling a "catchy" bul-lype that the fish cannot resist, while others in the party whistled and otherwise charmed the attention of the deep. Arthur Gustin followed in giving the fish a complete boiled dinner on his hook, and one fish in particular came to the surface with an agonized look on his face. He rolled from one side to the other with a greenish look under his gills for a few moments and finally sank to the bottom like a piece of lead. It was plain he had choked to death on the healthy lunch that Arthur had fed him. At least that was the only explanation that Doc Gibbs, local veterinary surgeon, could offer for the strange behavior.

A fine sail around Old Orchard, a little lake fishing, and home was the remainder of the programme. The party expects to make another trip to the briny before the season is over.

Grippe Prevalent

Mr. J. Adams and Mr. A. Houston were recent victims of the summer grippe that has been so prevalent locally. Both have now returned to work, but were confined to their homes for a week with the malady.

HEARD ABOUT THE PLANT

BLANKET WEAVING

By M. ANNE VANDANBURG

It. Peppers was glad to get a week off recently. Says he found just time enough to give his pants!

Mary R. and Irene said that they passed a real good vacation in Hartford. They also spent a week-end visiting Hartford.

Why keep us guessing George? Why not tell us all about it if you are in love with them?

Curious is a darned good ball player—especially when his sweetie is watching him from the grandstand!

Wonder what's the matter with Juliet and Thibault. The moment they look at each other they smile!

When Irene R. asks for a morning off you can bet your sweet life she had a date the night before.

Joseph was down at the beach with Cora G. He seems to be true to her as he didn't dare look out way!

What's the matter with Parula of No. 3 mill. All the boys want to tell you that if you leave your mouth open it is a very bad sign.

Theresa Landry—We all know how your mother is bothering you. Spend on the Thompsons gently and it will stop the pains and it will heal quicker.

Curious says: "My sweetie is so short that when I want a kiss she has to stand in a chair."

Ernest P. was seen on Thursday night going down Main Street at a 60 m. p. h. clip. He was simply going over to see his girl.

Say, Lakhan, what kind of a dog were you trying to demonstrate the other day at the gate when a dog came around and almost threw you to the ground.

You ought to see Theresa Landry when she's on the street with sweet Pete. Oh boy!

The marriage of Miss Mary Anne Dutil and Mr. Epitrou Arel was celebrated on May 23d. Mr. and Mrs. Arel will make their home in Woonsocket. R. I. Mrs. Arel's sister, Lydia, and brother, Leon, are employed in Carding 15-3.

Here are two jolly couples. From left to right we find Arthur Gaurin of the general office here, Annette Marie of Blanket Weaving, Blanche Audit and Armand Martin.

He's all mine!

Fra Cookson is feeling fine since her trip to Canada.

Blanche Perreault says that he is very proud to see his name in the Sheet each month. "I must be getting popular," says Blanche.

A week off was disastrous to Rose Camille. Her weight increased just 3.8th of a pound.

Quite a few of our Pepperell girls have spent week-ends at Riddford Pool. Among them are Anna Dauphina, Alphonsine Poirson, Philemon Whitten, Jeannette Laferte, Louis Poirson, Blanche Fortier, Faldia Poirson, Lena Samson, M. A. Vailancourt, Mr. and Mrs. Edmund and daughters, Yvette, Marie and Annette of Lewiston, and Mary Goodrich and Elizabeth Miron of Auburn.

Emile Belcourt, the famous one-hand driver, is taking things easier than ever now. He is teaching his girl friend how to drive the buggy.

CARDING 11-3

Leon Jallart has asked to be away from the mill for a month. Don't suppose she's gonna get married, do you?

We wonder if A. Tetrault found out what kind of gun was in the box. (Where did you drop your nickel in. Ha! Ha!)

Plenty of chances for Rose C. There are a lot of old bachelors working here.

Wonder what the attraction can be in the weave room at noon hours for Rock Duncan?

Fannie R. had a heavy date for 9:30 one night recently. Wonder who the lucky guy would be.

Don't worry Rose C.—there'll be another vacation bye and bye!

We hear that Janet can swim like a fish—and Launette like a brick!

Would advise John Sullivan to watch out or he'll get hooked by R. Sawyer.

CLOTH ROOM 19

By FRANK McNEUX

We are wondering when we will hear Maud Beauchemin and Renee Hannah in a laughing fit. Both of these young people have mischievous ripples and if we could only hear them both together we more would appreciate it.

George Thibeault refuses to let Old Sol

disfigure his complexion. Hence the reason for the straw with the big brim.

Since L. saw more in the parade than the rest of us for we were all quite sure that the men were walking on the pavement.

Elmer Hunter recently celebrated her tenth wedding anniversary. Hope that we will be able to help you celebrate your golden anniversary, Elmer.

We are pleased to have Stella Liting back with us again. We know that you missed us, Stella, as we did you.

Wonder why there is so much silence around Blanche and Eva's machine? Who said that girls have to talk all of the time?

Albert Harvey spent the Fourth of July in Manchester, N. H. Albert enjoyed himself immensely and reported plenty of fireworks.

Wonder why Blanche and Janet blush when a hundred and eighty yard cut is mentioned?

We all know now why Adolph Gagnon is so happy. You see Adolph is the proud father of a new little son!

We hope to have Mrs. McKenney back with us soon again. She has been out several weeks on account of illness.

The sympathy of all employees of the cloth room is extended to Mrs. Ora Malley upon the recent death of her husband, Walter J. Malley.

COTTON DEPARTMENT

By EDWARD CHAMBERLAIN

Friends and associates of James Malley of the Cotton Department were deeply grieved to learn of the death of his son Walter at the Walter hospital, July 2.

Johnny Sullivan is awaiting shirt at Green's Restaurant at Old Orchard Beach during the summer months.

All the boys report a very enjoyable vacation during the week of the Fourth.

George Lemay went to Old Orchard with a certain young lady. And we understand that he spent all his money on the merry-go-round and that he made the girl walk home. How about it, George?

Hughie says that when Columbus came over here and discovered America the first night he and the Indians stayed out all night, and the next and the next; in fact,

These fine children have a proud mamma in Mrs. Rosina Dupont, who is a weaver in 33-A. They are Lucien, 7 years of age, Erre, 5; Alphonse, 4; Angella 3, and Renoit, who is only one year of age. We certainly call this a fine family of children!

CARDING 173-174

We are sorry to see that Mrs. Rose King of Room 174 had to submit to an operation. We are hoping for a speedy recovery.

Mrs. Mary Deschamps of Room 174 met with an automobile accident, July 4, and she is confined to her home. Also hoping for a speedy recovery.

Among the new faces employed lately in this department are Miss Bertha Hamilton, Mrs. Delvina Gagnon, Miss Lillian Gagne, Mrs. Emma Gagne. Glad to see you with the Pepperell force again.

Armand G. has lost his place at the sheik. I'll miss Arthur Gendron in with us. Just wait till you see his picture, girls.

We would like to know when Marie F. of 163 is going to decide and get married. Let us know ahead when the big event is coming off.

We would like to know if Baxter's intentions are good. We will stage a stag party, Buster. Hurry, please.

About time that Yvonne of 18-3 should get a steady. Some of the boys would be good company, Yvonne.

A good advice is worth quite a lot sometimes. Oh! yeah!

SPINNING 18-5

By MARIANNE ROYER

Wonder how it happens that a certain young lady always sits in her car in front of Fishman's every Saturday night?

Mr. Baleson—aren't you tired of riding you bicycle every night?

Armand G. Why don't you hike up Cleveon street nowadays? Has she given you the slip?

Marie D. is kind of sulky lately. What is the matter Marie?

Our roving boy is a great hand to get doughnuts from the lunch cart. Is he trying to get fat?

And then every other evening or so we see Gendron picking his weary way up Alfred Street. My! What a hill climber!

Looks as though there is going to be a "permanent" beauty contest going on here for some little time to come. Meet all of the

Lucine Demers, 7 year old son of Mrs. Rosina Demers of 80-A, is studying the violin under Albert Lauson, talented local teacher.

Take a spin at Jim Owens, a former employee of Carding, where he worked for Mr. Remillard.

he said that was when the "Nights of Columbus" started.

Frank Martell has gone baying for the summer and we know that he will enjoy it very much.

Joe: "When I eat bananas I can't sleep."

Jack: "With me it is just the opposite; when I sleep I can't eat bananas."

You sing a little song or two, and have a little chat.

You make a little candy fudge, and then you take your hat.

You hold her hand and say "Good night" as sweetly as you can.

Isn't that a heck of an evening for a great big healthy man?

Richard Lefebvre recently entered the Welles hospital for treatment to an eye infection. We are very glad to see him back on the job once more.

Johnny is driving his Ford back and forth to the beach. The motor is so efficient one would never know there was one in the car.

Willie St. Oren to now employed on the Boston & Maine railroad during the summer months.

Orron to George: Did you get a hair-out?

No, I just had my ears moved down an inch.

Billy Oakes' many friends claim that he has shelved his face. Not a smile in a month.

Joseph Lee, son of John, of the Opening room, has entered the employ of Green's restaurant at Old Orchard Beach.

Chester Johnson of this department was a recent visitor at Hampton Beach.

George: "Do you get?"

Marie: "Sleep, asleep."

George: "Go ahead, I'll be the goat."

We have nothing for Joe Whitworth this month. He was very quiet over the holidays.

This is pretty Rita Simard, daughter of Mr. and Mrs. Francis Simard (yes, we mean the old reliable baseballs "Buz"), who works in the dress room. Rita is what you would call "My sweeter than sweet."

girls have got one.

Friends of Mrs. Hamel, former 18-5 employee, congratulate her on the birth of a baby girl.

DRESSING 17-3

Ask Martin, our second-hand, about the time he went deep sea fishing and got so sick he wanted to jump overboard.

All employees of this department are congratulating Mr. Koehn, who recently became the proud father of a baby girl. Clarence says that he brought out two cigar stumps and was about to purchase a third when the demand pestered out sufficiently to call a halt.

WEAVING 53-B, 73, AND 83A

By ALICE BEAUBIER

A very devoted mother must have only son to Europe to study music. Upon his return the mother invited a famous musician to hear the son give a recital. When it was over she turned to the great honored and asked, "How do you like his execution?"

"Ah, that would be fine!" he replied, which reminds us of a lot of our gifted (?) musicians who overheard a saxophone and screech a fiddle!

Al B. has a new way of building a garage. He put his Ford in the desired location and built a garage around it. But when he had finished he found that he had forgotten to leave room enough in which to get the car out!

For Sale One black and white cat cheap, only \$19.98. A very fine bargain but has a heavy appetite. See Peanut P. for particulars.

George D.: "Pardon me for walking on your feet!"

Pat: "Oh, that's perfectly all right. I walk on them myself!"

The other morning one of our Shells came into the room with a nose that looked

as though a tractor and a couple of plows had exploded in. The Sheik was a fine example of what the modern girl can do to you if your magnetic personality and strange powers exceed the limit. What was her name, Sheik?

BLANKET CLOTH ROOM (Upper Room)

By DORIS HENNEY and MYRTLE DUNE
Mrs. Anna Mack and Mrs. Mildred Holt spent the holidays in Lowell.

A Robarge, Raymond Courtois, Mrs. Drayton and sons all spent their vacations in Canada.

Auntie and Clyde have both returned to work after being out for a time. We are glad that they have recovered.

If you don't want your pictures taken keep away from this department during the noon hour. Auntie Stevens had a hard time getting in.

If you wish to know of a good place to swim just ask Leona and Ruth. Also ask them what is the best time to go!

Ask E. Buck how his blighted thumb is getting along! Next time don't hold onto the screen so hard!

We know that Alice G. likes them dark and tall. Is that your reason for studying French, and does this mean that it is the end of your Happy days?

Pebe doesn't know what he would do without Esther. She just won't let his collar wrinkle up!

Have you noticed that Ruth S. is wearing her boy friend's watch? This one is named Albert. Do you know him?

If you want to get a good sun tan, take up golfing. That's how Kay S. got hers.

Keep all those hugs for Chester, Juliette. They don't mean a thing to Lillian. Letitia is still John's little rapper.

BLANKET CLOTH ROOM (Lower Room)

By MYRTLE DUNE

The sympathy of the entire department is extended to Mr. and Mrs. Arthur Plante in their recent bereavement.

Mrs. Purley Collins and her son, Ben, spent their vacation at Hills Beach. They also visited the mountains.

Juliette reports a pleasant trip to Canada. It seems good to see Mr. Bolduc back at

Introducing "Billy" Oakes of the Cotton Department, and—we'll say he is in good company—none other than little Theresa Lee, daughter of John Lee, Foreman of the opening room.

his work after being out so long on account of illness.

Louella Hammond and Lloyd EWH, Thornton students, have entered this department during the summer months.

We hope A. Buck will find it so pleasant here that he'll decide to stay. We certainly are glad to welcome you, Albert.

Mr. and Mrs. Harbey Lewis have returned from a motor trip thru the mountains.

Mr. and Mrs. Louis Bolduc have returned from their honeymoon and have taken an apartment in the Puller block on Alfred street. Mrs. Bolduc was Miss Irene Alarie and works in this department.

Rose Beauchemin and Ivy Thomas are on a month's vacation. Rose has gone to Canada and Ivy is visiting her father in Charlotte, S. C.

Freda and Annette Carrier spent their vacation in Lawrence, making the trip in Manuel Williams' car.

Isabelle Meiboh and Nabel Landry are back with us after a few weeks' vacation.

John L. has been called to New York by the serious illness of a cousin.

Most grateful we are to Maud for sharing her garden with us; the roses that she brings daily help to brighten up our already immaculate department!

SUMMER VISITORS AT MILL

Following is a list of folks from far and near who have paid a visit to the plant during the past month. The trip is well conducted and many exclamations of surprise and appreciation are heard in regard to the size of the plant and the variety of its product.

7-7-30

Mr. and Mrs. Louis Warrent, Bronx, New York.

Mr. and Mrs. H. M. Fulton, Washington, D. C.

Miss Narcissa Pelletier, St. Fortuna, P. Q., Can.

Mr. A. D. Savage, St. Fortuna, P. Q., Can.

Mr. A. Robarge, St. Fortuna, P. Q., Can.

Mr. and Mrs. A. Dempsey, Jamaica, L. I.

Mr. and Mrs. A. L. Nantz, Arlington, N. J.

Mr. Sydney Spearber, Montreal, Canada.

Mr. Rymon Feldman, Montreal, Can.

Mr. Samuel Cohen, Bronx, N. Y.

7-8-30

Mr. William Slater, Providence, R. I.

Miss Kathleen Madden, East Providence, R. I.

Mr. J. M. Frost, San Antonio, Tex.

Mrs. Edna Cohen, San Antonio, Tex.

7-9-30

Mr. A. W. Stout.

Mrs. C. W. Barber, Miss F. L. Crittendon, Miss J. W. Crittendon, all of Washington, D. C.

Mr. and Mrs. W. L. Gallagher, Uhrichville, Ohio.

Mr. and Mrs. C. E. Wikman, Newtonville, Mass.

Mr. Joseph E. Smith, Montreal, Canada.

7-10-30

Mr. and Mrs. Athlete Belanger, Southbridge, Mass.

Mr. and Mrs. E. E. Clarke, Milford, Mass.

Miss Muriel R. Neal, New Haven, Conn.

Mrs. Elmore Street, Mrs. Summer Brown, both of North Raymond, Me.

Miss Laura R. Thompson, Miss Elizabeth Corbin, both of St. Louis, Miss.

7-11-30

Miss Jean Bunch, Hooperston, Ill.

Mr. J. E. Maher, Danville, Ill.

Mr. and Mrs. E. Charland, Mr. and Mrs. D. Dupont, all of Indian Orchard, Mass.

7-14-30

Mrs. B. H. Crofton, Miss E. R. Freeman, both of Newton County, Mass.; Mr. and Mrs. L. A. Dumas, Quebec City, Canada; Mr. and Mrs. A. L. Solomon, Abolton, ENG.

An old maid went to have her picture taken and the photographer noticed her trying a piece of clothes line around the waist of her skirt.

"What's the idea of that?" he asked. "I can't take your picture that way."

"You can't find one, young man," said the old girl. "I know you see me upside down in that corner!"

Francis Ouellette is the 4 1/2 year old son of Mr. and Mrs. E. Lou Ouellette, local barber, 88 Alfred street. Francis is the nephew of Wilfred Ouellette of 55-B.

Pauline O'Brien is the 6 year old daughter of Mr. and Mrs. Edward O'Brien. Pauline is a cousin of Margaret Muller, who works in weaving for Mr. Bayne.

LOCAL SPORTING NEWS

BARRY TOWNLEY.

Geswed Paquette is a charming boy who loves the girls and still finds time to work in 11-5.

PEPPERELL BOYS ARE GOING LIKE HOUSE ON FIRE

The Pepperell baseball team in the Manufacturers league is leading the other teams in the league standing. There are four teams, Red Men, Sam-Lewis and Johnny Walker's Old Orchard outfit.

There have been some mighty interesting games so far and it is a down-right shame that the fans of the two cities do not take more interest in the league. The boys who make up the teams are deserving of better patronage. They give much of their time practicing for the games and naturally it means a lot of hard work. Baseball is not all play by a long shot. For that reason the fans should turn out and drop a few quarters at the ticket office in exchange for admissions to the games.

The Pepperell team is made up of a smart aggregation of local ball tossers and it takes more than a champion team to beat them. In Jim Lombard and Ted Shevenell they have two classy catchers. Both boys have showed their stuff in pitching all games to date for Pepperell.

Some have suggested twilight league games but others say that if the games can't be made to pay on Saturday afternoon the fans will not turn out evenings.

Come on men and boys, turn out and help boost the Manufacturers league games. Encourage the players to keep up the games and do your part and a little more in helping make the games pay.

The makeup of the Pepperell team is as follows:

Pepperell Beats Collingians.

The champion Pepperell baseball team went to Kennebunkport Friday afternoon, July 15, where they met the famous Kennebunkport Collingians and administered a

7 to 5 defeat to them. It was a very interesting and close battle. Pepperell, however, showed their superiority. Jim Lombard and Ted Shevenell took turns in the hot for Pepperell.

PEPPERELL BOXERS MAKING GOOD IN BIG BOUTS.

Promoter Tommy Travers is getting demands almost daily for bouts from the Pepperell stable and the boys who are sent to exhibit their wares are doing so with a vengeance. On July 4th, Rocky Stone and "Bugs" Baker took part in bouts at St. Stephens, N. B. Stone went a draw with Eddie Eason, while Baker won on a foul from Danny Lee after two rounds of fast boxing.

On July 14th Ted "Kid" Drew put on a whirlwind of a bout with Johnny Nemo, welterweight champion of the Maritime Provinces, at St. John, N. B. It went ten rounds to a draw. Rocky Stone K. O'd Ray Wileck in five rounds. "Bugs" Baker stayed two rounds with Danny Lee. Spud Murphy won a six-round decision over K. O. Knudson.

Drew Vs. Jones

There is great interest locally in the bout between Ted Kid Drew of the Pepperell stable of boxers, and Holiday Jones, billed for July 22 at the Exposition building, Portland. The bigger and better the boxers, please Ted to the limit. He does not want any setups.

Tommy Was Hard to Beat

John Barnham, the Pine Point farmer, had as a recent guest Tommy Sullivan, a former Saco boy and in his day one of the leading welterweights in the fight game. Old-timers will remember Sullivan in his bout with Mike Joyce of Portland at the old skating rink on Starer street, Saco, now owned by Anton Hahn. This was one of the toughest ever in the two cities. There was no love between the two gladiators and when the bout finally finished they were

These cute little girls are Paulette and Rita Roy. Paulette is 8 and Rita 4 years of age. Their big brother is Rene of 12-5, and their big sister is Blanche of the same department.

If you don't think that Raoul Binette of 18-5 was a good looking baby just take a look at this picture; Raoul is the same good looking baby.

each a sight to behold. Both were covered with blood. Tommy went to Lawrence, Mass., where he continued the boxing game and was a big success financially. He took care of his money and later put on a big bout of Packard taxi and has been very successful. It was a treat to Tommy to be among his old-time friends in Biddeford and Saco once more. He was warmly congratulated by Mr. Barnham on his advancement in business. Tommy was at one time employed in the spinning room of the York mills, when the late Cash Tarbox was overseer.

Swimming Lessons Free

Michael J. Mogan, detective in the Pepperell mill, is devoting lots of his time evenings, instructing boys on how to swim, at Thetons creek, above the Eastern railroad bridge. Mr. Mogan has built a bridge in back of his home on upper Main street, across the creek, his garden being located near the creek bank, and on this bridge is held the big study of diving, fancy and otherwise. Students are also instructed in the idea of swimming and how to act in emergencies and save themselves from drowning. Detective Mogan is assisted in his great work by Patrick Murphy of the sailing-up crew in the Pepperell from the Sam-Lewis Slugs, who also drives home his points from the bridge.

A Good Selection.

The management of the Manufacturers league made no mistake in picking Pete Dubois as official scorer of all games in the league. Mr. Dubois, who is employed in room 64, Pepperell, made a big name for himself as quarterback on the East End and St. Andrews football teams when they were winning from the best in the state. Pete certainly filled the shoes as quarterback in those days. Today he can go out and show 'em how to play the position.

THE PEPPERELL SHEET

A happy go lucky bunch from 18-A. From left to right are M. Hodge, V. Currievan, Fula Larrison and M. Samson.

Still Remembers Biddford.

"Bury" Howard and Jimmy Hickey moved to Boston Saturday, July 13, where they were the guests of Freddy Maguire, the sensational second baseman of the Boston Braves and were royally entertained by the club. It will be remembered that Freddy Maguire was captain and a member of the Diamond Match team years ago while living at Old Orchard and was a member of the Match aggregation along with Del Blumenshine of the Brooklyn Nationals, when a big delegation of Sanford sports came to Biddford and backed their Sanford team to beat the Diamond Match side in a series of games at Prospect park. Wednesday afternoon, the well known Portland sporting writer, was manager of the Match team and he certainly had a great aggregation of ball players. In fact it was so good that they beat Sanford in a grand-dish and made every Biddford and Sanford happy by winning big bets for them. Freddy has not forgotten those games in Biddford and he was mighty well pleased to meet Messrs. Howard and Hickey and inquired for many acquaintances locally and

hopes to meet them all once more. He sent his regards to Biddford and Sam baseball stadium. Messrs. Hickey and Howard were guests of Maguire at the double header between the Boston Braves and the Chicago Cubs at the Braves field and had the pleasure of seeing their old team make help wonderfully in winning both games, 2 to 1 and 3 to 0. Freddy told the Biddford ball players that if the Braves had better pitching they would be up in the first division, as the rest of the team was going good. "I am coming often to Boston to see you play, Freddy, and your team has yet to be defeated when I am at the game," said "Bury" Howard. "We want you to come often and help us get into the first division," said Freddy.

CLEANLINESS DISCOURAGES THE GERMS

By C. O. Sappington, M. D.

Director, Industrial Health Division
National Safety Council

Washing the "lunch books" before eating has been urged to prevent harmful germs being carried into the mouth on food, but there is also a stronger argument for washing up between meals. The cleaner the skin, the less danger there is of infection in case of injury. Whenever there is a wound there is as much danger of infection from germs on the skin as from germs on the instrument causing the wound.

Writing in The Cleanliness Journal, Dr. Lloyd Arnold points out that the normal skin, when clean, disinfects itself rapidly, and that accumulation of dirt on the skin retards this germ-killing action. Accumulations of dirt and oil provide a lodging place for bacteria which wait to be carried to the mouth or find a break in the skin to do their dirty work.

Certain experiments have shown the limits of cleanliness. In one case *Staphylococcus* cultures were applied to the hands before and again after washing at the end of a day's work. After ten minutes the dirty hands showed no reduction of bacteria; the hands which had been washed had lost 85 per cent.

After 20 minutes the dirty hands had lost only five per cent of the bacteria; the clean hands were entirely free.

After 50 minutes the dirty hands still retained 85 per cent of the germs.

Which hands would be better able to resist infection from a cut or bruise? Which hand would you rather shake? With which hand would you rather eat?

Just about right! More folks from 18-A, namely, Ted Haigner, Jerry Hubert, Miss Hansen and our second hand, Pete Larrison.

CHEMISTRY IN THE HOME

(Continued from Last Month)

Easter bonnets take on new and brighter hues.

Any kind of dye found in nature can be made in the laboratory, whenever its composition is understood, and usually it can be made cheaper and purer than it can be extracted from the plant. But to work out a profitable process for making it synthetically is sometimes a task requiring high skill, persistent labor and heavy expenditure. One of the most striking achievements of synthetic chemistry is the manufacture of indigo.

Indigo is one of the oldest and fastest of dyes. To see that it is both ancient and lasting look at the unfaded blue cloths that en-wrap an Egyptian mummy.

In 1897 nearly a million acres in India were growing the indigo plant with an annual crop value of over \$20,000,000. In 1914 India produced less than \$200,000 worth. What happened? The Badische Co. of Germany had worked out a practical process for making artificial indigo. This

Mr. William B. Cox makes a pointed reply to Archie King's poetry.

—By Ed. Dennis.

This is Margaret, daughter of Mr. John Munkel of the designing department. Margaret was enjoying the cool waters of Cobscook's Pond at Windham, N. H., when the picture was taken. The Sheet offers an unusual reward for the person bringing in that startling picture of her Daddy taken on the same occasion!

company spent over five million dollars and kept Dr. Van Duzer and a corps of highly trained men seventeen years in chemical research before they could make indigo, but they gained a monopoly of the world's production. Fifty years ago indigo cost 14 a pound, in 1914 it was fifteen cents a pound. Even the pauper labor of India could not compete with the German chemists at this price. At the beginning of the present century Germany was paying India more than three million a year for indigo. Fourteen years later she was not only supplying her own increased demand but was exporting over twelve million dollars worth. Besides its cheapness, artificial indigo is preferable because it is of uniform quality and greater purity. Vegetable indigo contains from forty to eighty per cent impurities, among them other tinctorial substances. Artificial indigo is made pure and of any desired strength, so the dyers can depend on it.

The thought of this trip to the banks of the Rhine brings back once more the memory of twelve years ago and the time the chemist spent as a scientific soldier. He does not like to think of his experience in this field, for war in all its forms is hateful to him, and chemical warfare most of all, yet he recognizes its grim necessity and accepts it. During the World War the importance of the chemist was realized more than ever. Chemistry offered very effective weapons against the enemy. During the first part of the war, as during the twenty or more years preceding it, Germany realized the importance of chemistry. She saw that with practically little alteration a chemical factory could be changed into a terrible war machine, and that the chemist with his test tubes was far more powerful than a regiment of soldiers. Had either side fully realized and recognized at the beginning the effectiveness of the various gases used at the end of the war when the war would not have started or it would have been over in a few weeks. What will happen in the next

war no one can predict, but it is sufficiently clear that the nation that can make the most effective use of chemistry will have the best chance of winning.

And so after a full day we find the chemist in the quiet solitude of his evening fireside. But the shadow of his work still follows him there. The story is not complete without showing the important part which chemistry has played in the development of the incandescent lamp. No stretch of the imagination could lead us to believe that this was an apt name for the feebly glowing lamp, with its pale yellow light, which Edison placed on the market in the form of the old carbon filament lamp. It was not until the metallurgical chemist worked his magic that the lamp became truly incandescent. Let us consider the cage which encloses this superlative glow. Pyrex glass of the chemist with its high mechanical strength has replaced the old soda lime glass, which was so fragile. In addition we now have the pyrex bulb frosted on the inside, which was possible only when the chemist had devised a means of properly handling the hydrofluoric acid solution which is used in the etching. The various colored bulbs which are on the market are possible because of the chemist's knowledge of the action of certain chemicals on the glass when in the molten state, imparting these many tints and colors.

The filament, which is the seat of the glow, is one of the wonders of modern science. It has an encyclopedic history from the melting of the ore to the final formation of the wire, one thousandth of an inch in diameter. In the days of the old carbon filament lamp, one of the greatest difficulties in the way of mass production was the lack of a good cement which holds the base of the lamp to the bulb. All sorts of glues, pastes and cements were tried, but none was perfect until the chemist developed bakelite, so safely and so securely cement the bulb to the base. The brass base must be heated to the glass bulb at carefully regulated temperature. In most operation of this type, the

The Mayor of South City, Etc. At election time it was rumored that Mr. Whitehead was a staunch supporter of Boney Owen for this important office. Needless to say, the rumors were not biting good when Boney clambered up into the truck.

Lillian Guertin of Cloth Room 19:2A is shown here wearing her very best smile. Of course Lillian is also wearing a complete equipment of clothing along with her smile.

temperature of the oven would be taken, but here a small amount of malachite green is mixed with the bakelite and this dye decomposes at exactly the proper temperature. The oven temperature at this time may be several degrees above the temperature of the lamps. I often wonder how many people ever connect the ideas of chemist and incandescence when taking advantage of this most wonderful invention, the cheapest form of energy, we can obtain, which turns night into day.

Chemistry in particular serves as a splendid illustration of what a science really is. Modern chemistry with its far-reaching generalizations and theories is a fine example of how far the human mind can go in explaining the unknown beyond the limits of the human senses.

For those who seek recreation in travel a little knowledge of chemistry will do much to brighten the way. Those beautiful colors of the Grand Canyon, that defy description; the sulphur deposits in the grottoes of Vesuvius; the everlasting fire of Baku; the trays of tea on the hillside of Japan; the salt basins along the coast of China—these all speak of chemical processes and have an increased interest for those who have a little knowledge of chemistry.

Chemistry is a growing science, and those who labor for its advancement press forward in ever increasing numbers, with confidence renewed by every new success. On the frontiers of all the principal fields of chemistry are important unsolved problems and newer ones are disclosed with each step in advance. To those who possess this pioneer spirit chemistry offers the most fascinating of all pursuits—the exploration of uncharted realms.

GOLD STAR SAFETY CONTEST—1 9 3 0

1930	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Biddeford	4.6	1.0	1.8	1.5	.5	1.7						
Lewiston	1.3	5.0	2.3	1.7	4.6	5.0						
Fall River	9.2	3.0	5.4	2.7	0.0	7.5						

CONTEST NEWS

Biddeford chalks up another Gold Star and the Bleachery hangs up a red one. Last month's winner falls back quite heavily.

Half the race is over and four out of six of the gold stars have gone to Biddeford while both Lewiston and Fall River have won one. Lewiston, however, has captured three red stars to Fall River's one.

It has often been said in Massachusetts that "detract in the stocks," in Maine, there is nothing known about safety and that no interest is taken in guarding machines or in preventing accidents by other means, but so far in this contest the results do not indicate this.

In all fairness to Fall River, we must remember that the plant is new and that they haven't acclimated down to their steady pace yet. The fact that they came through with a more care last month indicates that they can do it and probably will take a winning spot for the rest of the year.

KEEPING HIM GUESSING CAUSES ACCIDENTS

To war it is considered good strategy to keep the other fellow guessing. In traffic it is the worst possible blunder.

Just watch some drivers in action. They can't make up their minds which side of

the road is better for driving and weaves from one side to the other. When they stick their hands out you can't tell whether they are going to turn or are just flicking the ashes from a cigarette.

Also, watch some people crossing the street. They step from the curb before looking both ways, then hesitate about what to do next. The driver slows down—if he doesn't, it may be just too bad—and the two of them do an Alphonso and Gaston act in the middle of the street. The hesitating pedestrian may finally decide to waver on and perhaps he will get in the way of a motorist who has decided to pass the patient driver.

Planning the job carefully prevents many accidents in the factory. Planning what you are going to do before stepping from the curb will prevent many mishaps on the street. Dodging among cars is dangerous business, but if you are caught in traffic it is often better to stand still and give the approaching driver a chance to avoid you. It is harder to hit a moving target with a rifle, but it is easier to miss a stationary pedestrian with an automobile. If you keep the other fellow guessing he may guess wrong.

OUR OWN ACCIDENTS

A man in the card room at Biddeford instead of shifting a belt in the usual way, used a leather case which caught in the pulley and the man was thrown to the floor. This is the second case of a driver left accident in Biddeford card rooms. The other one was fatal and this one might have been. It is unfortunate that there are no belt shippers and therefore the men doing this work must be extra careful not to take unnecessary chances.

Another man, an experienced doffer, stood in line with a spinning frame belt while the other doffer was starting the frame with a button, because the contact area of the belt was too small. The belt slipped between the frame and pulley, leapt and flapped up, hitting the man's eye.

There are a number of safety items that could have prevented this accident. The man who was hit should have known better than to stand where he did. The man holding the button should have been more careful to put flat tension on the belt rather than push it sideways and also should have warned the other fellow not to stand where he did. It was also unfortunate that the diameter of the overhead pulley was so large in such a low posted room that the contact area of the belt on the frame pulley was not sufficient to start the frame without the assistance of the doffer with the button.

The other accident occurring at Biddeford was a weaver getting his finger jammed between the shuttle box and the frame of the loom while taking off some loose filling. Most weavers know that there is very little room between the shuttle box and frame when the box comes forward, but sometimes they either think they are quiet enough to remove filling between the strokes or else do not think about it at all and get caught.

At Lewiston, there were also three lost time accidents. One was caused by a man striking his shin against a track and badly bruising his leg.

Another received a scalding burn in the eye. Both of these accidents could have been prevented by the exercise of a little more care. Goggles also might have been useful in the second instance.

The other case was of a man overcome by aniline dye fumes. He nearly died because of two reasons. He did not (and was not compelled) to report for First Aid

promptly. After he was sent home he did not keep off his feet entirely and had a bad swelling.

Don't take any chances if you get a dose of aniline black or para red. Report to the first aid promptly and then do exactly as you are told.

There was another accident (17) which occurred at Lewiston, but the man lost no time. It should be mentioned, however, because of the lesson it teaches.

A second hand in a mopping room climbed up on a motor platform with an air hose to clean down the ceiling while the power was on. He was hit by the clutch, but nobody was not injured badly.

When a man who is supposed to act an example to the others in a department does a stunt like this, how can the others be expected to work safely?

There were three lost time accidents at Fall River, but the nature of the injuries is not known at this writing.

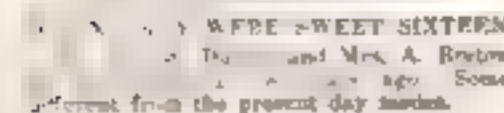

A REAL SAFETY RECORD.

It can be done! Mose Belair, recently retired as a loom fixer for Mr. Sawyer, worked at his trade for 40 years faithfully and well, and practiced safety for each day of the 40 years. He never had a lost time accident! Mr. Belair resides at 57 Hill street, City.

The Lewiston Division of the Popperell Sheet is published in connection with the Baddford Division.

---BASEBALL---

THE CHAMPIONS

The Lewiston Bleachery baseball team, for two years winners of the local Industrial League pennant. In the front row from left to right are: Lefty Turcotte, pitcher; Joe Markins, shortstop; Jimmy Leigh, manager; Barney Hennessy, outfielder; and Freddie Leighton, catcher. In the rear row: Manager Elmer Griffin; Oscar Wessington, third baseman; John Finn, outfielder; John "Shark" Gahagan, outfielder; Stanley Clements, twirling arm; Mike Goff, first baseman; Frank Nugent, second baseman; Wilfred Roper, infielder, was absent at the time this picture was taken.

Bleachery Team Wins Industrial League Championship Without Losing a Game!

On June 12 at the Auburn Athletic Park, the Bleachery ball team applied a coat of white wash to the H. G. Lumbard team. Lefty Turcotte held the shoeworkers to 2 bingles while our boys were collecting nine. Frankie Nugent and Joe Markins with two hits apiece led the attack. One of Nugent's hits was for two bases.

The scores:

Two base hits, Nugent, Clements. Home runs, Macklin, Nolan, Baker, Leighton 2, Hennessey 2, Nugent, Finn, Sacrifice, Wessinger. Left on bases, Bleachery 7, Peck 18. Base on balls, off Ailey 4, Turcotte 2. Struck out, by Ailey 6, by Turcotte 2. Hit by pitcher, by Ailey (Gahagan, Finn.) Umpire, Talcott.

Bleachery 15-Ault-Williamson 7.
In the final game of the Industrial League played on July 16, the Bleachery Boys won by a score of 15 to 7, thereby winning the league championship for the second consecutive season. The team went through the season undefeated, it being the first time that a team has won the coveted

JACK MR. VOLSTEAD.
Laura Bristol and a friend are about to enjoy a glass of tea. Oh, yeah?

honor without losing a game.
In this game Hennessey with a single, a double and a triple, led the attack. Lefty Turcotte pitched a good game and also connected for two doubles. Frankie Nugent got himself three singles and played a sweet game at the initial sack.
The Bleachery team will now make a start in the new City League, where the competition will be keener and we are rooting for them to cop another cup.
The scores:

Bleachery						
Macklin, ss	4	3	1	4	0	1
Leighton, c	4	1	1	4	0	0
Wessinger, 2b	4	1	0	0	0	0
Hennessey, lf	4	2	3	1	0	0
Nugent, 1b	4	3	2	0	0	0
Kayser, 3b	3	1	1	2	4	0
Finn, cf	3	1	0	1	0	0

Bleachery 3-0 1-1 0-4-15
Aults 0-0 0-2 4-1-7
Two base hits, Nugent, Kayser, Wessinger, Turcotte 2, Hennessey, Moulton. Three base hits, Hennessey, Ned. Base on balls, off Osgood 1, off Morse 1, off Turcotte 1. Hit by pitcher, by Morse (Harkins). Struck out, by Turcotte 4, by Morse 4, by Osgood 2. Losing pitcher, Osgood. Umpires, Fogg and Talcott. Time 2 hrs.

Bleachery 7-Trojans 5.
The Bleachery warriors broke into the City League on July 17 by taking over the Trojans by a score of 7 to 5. The Trojans have a team made up of the cream of local players who were looked on as sure personal winners but our diamond artists out-hit them to win. John Finn connected for two singles and Nig. Leighton poked out a two-bagger. Clements struck out eight batters and allowed but four hits.

L. R. D. W.	0	0	2	1	2	0

Two base hits, Leighton, Talcott. Base on balls, off Clements 1, off Baum 4, off Matthews 2. Struck out, by Clements 3, by Baum 4, by Matthews 2. Hit, off Clements 4 in 7 innings, off Baum 6 in 5 innings (none out in 6th), off Matthews 0 in 1 inning. Hit by pitcher, by Baum (Harkins). Passed ball, Leighton. Winning pitcher, Clements. Losing pitcher, Baum. Umpire, Fogg.

BLEACHERY REGULARS, 17/

BLEACHERY YANNIGANS, 4
In the annual diamond battle between the Regulars and the Yannigans played on June 20 the Regulars had no difficulty in proving their superiority. The Yannigans could gather but three hits from Clements, in three innings and none from Turcotte in two innings. The Regulars collected 12 hits for a total of 22 bases which is good hitting in any man's league.

Dominic Brassey will stage an act at the State Fair.

The nurses *know* LADY PEPPERELLS *are good*

THE nurses to know and appreciate good bed linen—they handle all sorts and descriptions in the training period, while a graduate nurse could almost qualify as a buyer of sheets.

Hospitals whose standards are high have selected Lady Pepperell Sheets and Pillow Cases from the time they were introduced. The firm, even weave, resistance to wear, and a finish that actually improves with laundering, give Lady Pepperells a reputation in high-class institutions of which the makers are pardonably proud.

They cost no more than sheets of comparable quality, and the 400 extra threads in the average sheet mean longer life.

Discriminating patients appreciate the care and foresight shown by the management of a hospital that selects Lady Pepperell Sheets for its bed linen supply. They strike the first and perhaps the strongest note in giving an impression of the high standard that prevails throughout such an institution.
